SOFTWARE ENGINEERING PROJECTS

Software Engineering Immersive | General Assembly

June 2022 - Dec 2022

Successfully completed 500+ hours of expert-led instruction in the industry's most in-demand technologies such as JavaScript, Python, Node.js, React, and more. Developed projects include:

- [Super Mario Saiyans](#) - a classic 2D sidescroller built with HTML5, Canvas & JavaScript
 - [Github repository](#)
- [SongSearch](#) - Node.js app built off of Genius' API that allows user to search for any song or artist and curate a lists of their favorite or most disliked songs
 - [Github repository](#)
- Generous - Collaborated with a team of 3 developers to build a full MERN stack application using MongoDB, Express.js, React, Node.js. Users can search for charitable organizations and view relevant information (I did a majority of my work on the backend)
 - Github repository ([frontend](#)/[backend](#))
- [TalkTotal](#) - A chat room based site built with Python Django. Users can create or join rooms based on different topics and leave messages in each room, which other users can see
